

## BUYING - ACCESS PANELS

Designed to provide a high quality solution to building services in ceilings and walls. Primarily used in domestic situations for access to rodding eyes and stop cocks our access panels are very easy to fit. The plastic access panels have a narrow 20mm profile providing an attractive solution with a lightly textured surface that will not discolour nor require decorating.

Access Panels are also available in steel, giving us scope to provide you with virtually any width / height combination, also allowing insulation and, or fire protection to be added - please call to discuss.
