

Type OFV-10

over fascia ventilator

- Hidden ventilation at top of fascia
- All roof pitches accommodated
- Integral insect screening
- Reduces fascia size and cost
- Provides statutory airflow

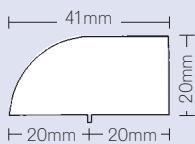

use

Alternative entry route for airflow servicing the roof space.

introduction

Over Fascia Ventilators are suitable for new and refurbishment work.

They eliminate the need for visible soffit ventilation and can be installed in non-soffit locations.

Over fascia ventilator OFV10, for roofs requiring the equivalent of a 10mm continuous gap. Suitable for roof pitches of 15 degrees upwards.

The Type OFV -10 is shaped to permit easy fixing to the top of the fascia board. It has an airflow rating of 12,500mm² per metre, making it suitable for use with roof pitches of 15 degrees and above. Integral insect screening.

data

- Polypropylene.
- Colours: black or white.
- 12,500mm² airflow rating.
- Size: 1000mm x 40mm wide x 20mm high.
- Suitable for roof pitches above 15°
- Integral insect screening.
- Integral fixing location holes.
- Packed in boxes containing 50no.
- Smaller quantities available

Type OFV-25

over fascia ventilator

- Hidden ventilation at top of fascia
- All roof pitches accommodated
- Integral insect screening
- Reduces fascia size and cost
- Provides statutory airflow

use

Alternative entry route for airflow servicing the roof space.

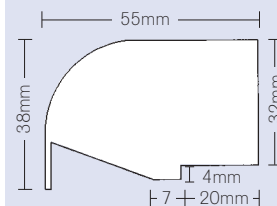

introduction

The Type OFV -25 is shaped to permit easy fixing to the top of the fascia board. It has an airflow rating of 25,000mm² per metre, making it suitable for use with roof pitches of 15 degrees and below.

Over Fascia Ventilators are suitable for new and refurbishment work. They eliminate the need for visible soffit ventilation and can be installed in non-soffit locations. Integral insect screening.

data

- Polypropylene.
- Colour: black only.
- 25,000mm² airflow rating.
- Size: 500mm x 57mm wide x 48mm high.
- Integral insect screening.
- Integral fixing location holes
- Primarily designed for roof pitches above 15°
- Packed in boxes containing 50no.
- Smaller quantities available.

Over fascia ventilator OFV25, for roofs requiring the equivalent of a 25mm continuous gap. Suitable for roof pitches below 15 degrees.
